LibraCELL v3.21

- **Start Up**
  - o If middle button is pressed during power up, LibraCELL shows "CAL " and adjust the zero offset
  - o If menu button is pressed during power up, LibraCELL shows "FACT" and restore cell to factory settings
- **Many other minor fixes!**

LibraPRO v2.21

- **Communications**
  - o Improvements in performance when LibraSPLIT is connected
  - o Improvements in the LibraCELL discovery protocol
- **Cell brightness**
  - o Adjust all the LibraCELL display brightness globally from LibraPRO
- **Relays**
  - o Bypass option to hide cells or group of cells from the relay trip engine
- **Many other minor fixes!**

LibraWATCH v4.0.1

- **New design & new graphics**
- **Drag and Drop cells in Stage Plan**
    - o Popup panel appears to the left with all the cells
      (Available for desktop and iPad only)
- **Multi Page View** (Available for desktops and iPad only)
    - o Up to 3 screens. Graphic, table and Plan
    - o User can select the size of the screens
    - o Last window and window configuration is automatically saved on LibraWATCH
      power down
- **Enable/Bypass cells option**.
    - o When a cell or group is bypassed, it won't create a trip in LibraPRO (relays) or
      LibraWATCH (notification/beep). This function will keep every setting applied to the
      channel
    - o v2.21 Adds no-cell bypass.
    - o By selecting cells in table view or in the All Views tab and right click you can select
      to Bypass or to Enable them
    - o Channels bypassed will appear in white
      (This function is not saved in power down. The system will be fully Enable after a
      LibraPRO power cycle)
- **Cell brightness** (Controlled with any LibraWATCH device)
- **Languages**
    - o LibraWATCH is available in more than 10 languages!
        - ▪ Russian
        - ▪ Portuguese
        - ▪ Finnish
        - ▪ Turkish
        - ▪ Dutch
        - ▪ Swedish
        - ▪ French
        - ▪ German
        - ▪ Italian
        - ▪ Spanish
        - ▪ English
- **Many other minor fixes!**
